

SITF - Species Identification Task Force - Information Form

|                 |                |       |          |
|-----------------|----------------|-------|----------|
| Award Number:   | 2024 5484      | Date: | 6-2-2024 |
| Judging Center: | PNWJC          |       |          |
| Awarded as:     | Domingoa gemma |       |          |

**ALL MEASUREMENTS IN CENTIMETERS OR MILLIMETERS ONLY.**

NOTE: LENGTH GIVEN FIRST AS PER STANDARD BOTANICAL PROTOCOL.

**PLANT**

|   |                                      |  |               |
|---|--------------------------------------|--|---------------|
| Overall length of growth/cane:          | 16                                   |  |               |
| Leaf                                    | number of leaves per growth or cane: | 1  |               |
| length:                                 | 9                                    | width:   | 1 cm          |
| margin:                                 | Smooth                               |  |               |
| shape:                                  | conduplicate lanceolate              | petiole length (apex of pseudobulb or stem to leaf base proper): | 5.5           |
| Pseudobulb/Growth/Ramicaul              | length:                              | 5  | diameter: 0.5 |
| shape:                                  | terete widest at leaf narrow at base |  |               |
| distance between growths along rhizome: | 0.5 cm                               |  |               |
| root tip color if visible:              | not visible                          |  |               |

**INFLORESCENCE**

|  |             |              |               |
|--|-------------|--------------|---------------|
| overall length:  | 35 cm       | arrangement: |               |
| distance from base of inflorescence to first bud or branch:  | see picture |              |               |
| distance between flowers along inflorescence:  | cluster     |              |               |
| distance from inflorescence to base of sepals (on an individual flower), OR if possible, distance from inflorescence to ovary (pedicel): | not visible |              |               |
| Floral bracts  | length:     | None         | width: none   |
| Ovary  | length:     | 1 cm         | width: 0.1 cm |
| shape:   |             |              |               |
| color:   | purple      |              | texture:      |
